

San Diego Cal. Aug 27/75

Professor Asch Gray

5 Cambridge, Mass,

Dear Sir: By this mail I send you a parcel containing 37-plants, I had intended to delay them until I had many more but think you may want them at once for your Flora of Cal. Unfortunately, many of the specimens are very poor, but it is the best I can do, —

351 - Got all of these plants were collected in July, 1875, out near Julian in this County, unless otherwise noted,

352 *Lolomia* = *linum purpureum*

353 *Phacelia* —

356 *Psoralea* ~~prostrata~~ ^{officinalis?} radical leaves, or a leaf radical leaf stems

358 *Hieracium* — ?

360 - *Silene* ~~canadensis~~ ^{canadensis, var.}

poor spec, grows up 3 to 5 ft high

364 *Asclepias* — Desert —

365 " — Ballena Valley —

369 - ~~*Propolis juliflora*~~ ^{*Propolis juliflora*} (*P. glandulosa*)

373 - *Delphinium* ~~nudum~~ ^{intermedium}

374 *Apocynum* *canadense*

375 (*Wrightia*) *A. rhombifolia* San Felipe —

377 *Erigeron* *plumbeus* n. sp.

380 *Hedeoma* *prostratum*, var.

382 *Aquilegia* *truncata*

383 - ~~*Sida*~~ *Sida hederacea* Junc - Soledad -

384 *Cestrogales* - *volcanicus*, Gray

385 - *Hymenoclea* - 2, San Diego, Aug 10, 75.

387 *Alysicarpus* (*Dial. Squarrosus*?) San Diego Aug.

386 San Diego Aug 10, 75.

190 Fruit of *Verticillium heterophyllum* -
ca. 1880. 5/75

Incog. send you a tale of 20 or 30.

more next week -

234 *Adiantum sparsefolia* -

Very truly yours

H. Cleveland

A good many of these plants
were obtained from Dr. Edward
Palmer, who has suggested, and
knows, that I send them to you
as he cannot forward his plants
under a considerable time -
